OFFICE ACTION

Response to Arguments

Applicant's arguments with respect to the previous office action have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8, 10-11, 16-20, and 26-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Fountain et al. (4019156).

Claims 1-2, 4-6, 8, 11, 16-20, 26-30, Fig.1 discloses a laser device having a laser medium 10 in a resonator cavity comprising: a) means 11 for pumping energy into said laser medium to increase gain of said laser device; b) active Q-switch (Pockels cell) means 17 having open and close states for controlling loss modulation of said resonator cavity; and c) passive Q-switch (saturable absorber) means 12 for further controlling loss modulation of said resonator cavity, wherein loss modulation control from active and passive Q-switch means enable generation of a short width, high peak power pulse at a lasing wavelength.

Claim 3, Abstract discloses the 5ns width.

Claim 10, Abstract discloses a solid state Nd:YAG laser.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fountain et al. (4019156) in view of Neev et al. (2003/0039274). Fountain disclose all limitations of the claims except for the Cr⁴⁺: YAG SA integrated to the laser.

Neev teach the Cr⁴⁺: YAG SA integrated to the laser (para.0031 and 0080).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Fountain what is taught by Neev to save space in the laser resonant.
